SCIENCE FILMS

Sponsorship guide for the **10th anniversary year** of the international, cross-disciplinary science film festival founded and run by scientists.

# Imagine Science Films

is a 501(c)(3) committed to promoting high level dialogue between scientists and filmmakers.

## Our Mission

Our mission is to bridge the gap between art and science through film, thereby transforming the way science is communicated to the public and encouraging collaboration across disciplines. Together, scientists, who dedicate their lives to studying the world, and filmmakers, who interpret and expose this knowledge, can make science accessible to the broadest possible audience. In celebration of our tenth anniversary year in 2017, we are rolling out brand new live events and programming, and an online video library containing over a thousand science films.

## Join us!

ISF works closely with every sponsor to create a customized package that best suits your brand's goals. Our team takes great pride in developing creative and flexible approaches to partner objectives. We offer year round opportunities to draw attention to your company at our New York, Paris and Abu Dhabi **flagship festivals** as well as at **satellite festivals around the world**, **monthly events in NYC**, **filmmaker-scientist competitions**, an **upcoming video series** and **our growing online platform Labocine**.

**15,000 scientists and filmmakers**  
have attended our annual festivals in  
New York City, Paris and Abu Dhabi

**Half a million** have been reached through our  
'experimenta' and 'spotlight' art-science videos.

Our new online archive, *Labocine*, will house  
**1000 science films online**, and already  
receives **500 views per day**.
